Create Image Wizard 

Image Archive Protection 

You can protect your image archive from unauthorized access.

You should specify a password if you want to protect your image archive from unauthorized access. You will need to enter this password before restoring partitions or separate files from the image archive. Please remember your password; otherwise, you will not be able to access your archive later. Please enter and then confirm the password if you wish to protect the image archive. Leave the password box empty if you do not want to password-protect your image archive.

Please enter the password:
